Department of Biology

PLAN OF LABORATORY WORKS

FOR STUDENTS OF 1st YEAR 2nd SEMESTER OF 2026/2027

SUBJECT "ECOLOGICAL PARASITOLOGY"

№	Topic	Date
1	Introduction to ecological parasitology. «Parasite-host» system	01.09/14.09.26
2	Parasitic system. Concept about parasitocenoses	15.09/28.09.26
3	Parasitic diseases and their classification. Biological basis of control of parasitic diseases	29.09/12.10.26
4	The host-parasite relationship at the population and organism levels at protozoan diseases	13.10/26.10.26
5	The host-parasite relationship at the population and organism levels at biohelminthoses	27.10/09.11.26
6	The host-parasite relationship at the population and organism levels at geohelminthiasis and contact helminthiasis	10.11/23.11.26
7	The ecology, biology and medical significance of ticks	24.11/07.12.26
8	The ecology, biology and medical significance of insects. **Test class in the subject**	08.12/21.12.26

Head of the Department,
Candidate of Veterinary Sciences,
Associate Professor R.N. Protasovitskay
